ALPHA LANGUAGES

TRANSLATIONS, INTERPRETING,
EVENTS AND CONFERENCES
CERTIFIED QUALITY

*Language Service Provider
with an international appeal,
always attentive to industry best practices.*

Day after day and with the utmost dedication,
we offer the highest quality language services.
We are always looking for technologically advanced
solutions, passionate collaborators and new ideas
from the world of linguistic services.

THE TRANSLATION

SELECTED PROFESSIONALS
STATE-OF-THE-ART SOFTWARE
TIMELY PROJECT MANAGEMENT

*Beyond the words, in our philosophy
the translation becomes a fundamental part
of a process of communication with the world.*

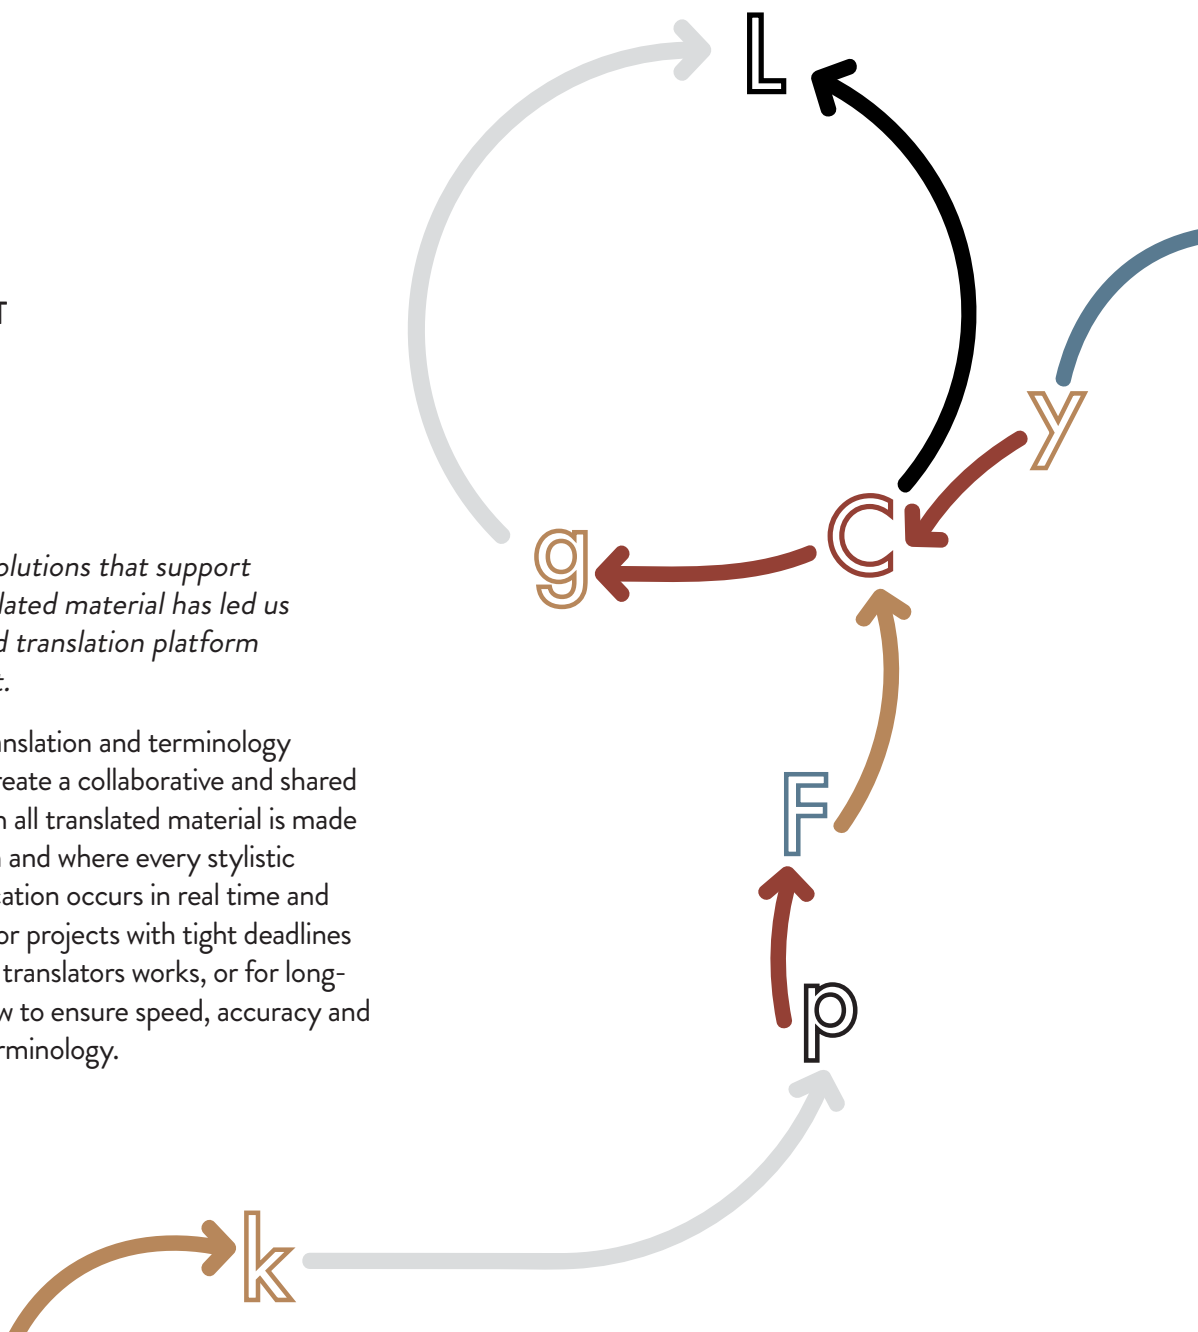

The translation process is followed at every step by the Project Manager: from technical preparation of the files, to selection of the most qualified professionals and quality control before delivery. We use technologies for workflow management, traceability and constant evaluation of the service offered, in addition to translation and lexical management systems capable of ensuring maximum consistency of style and terminology over time.

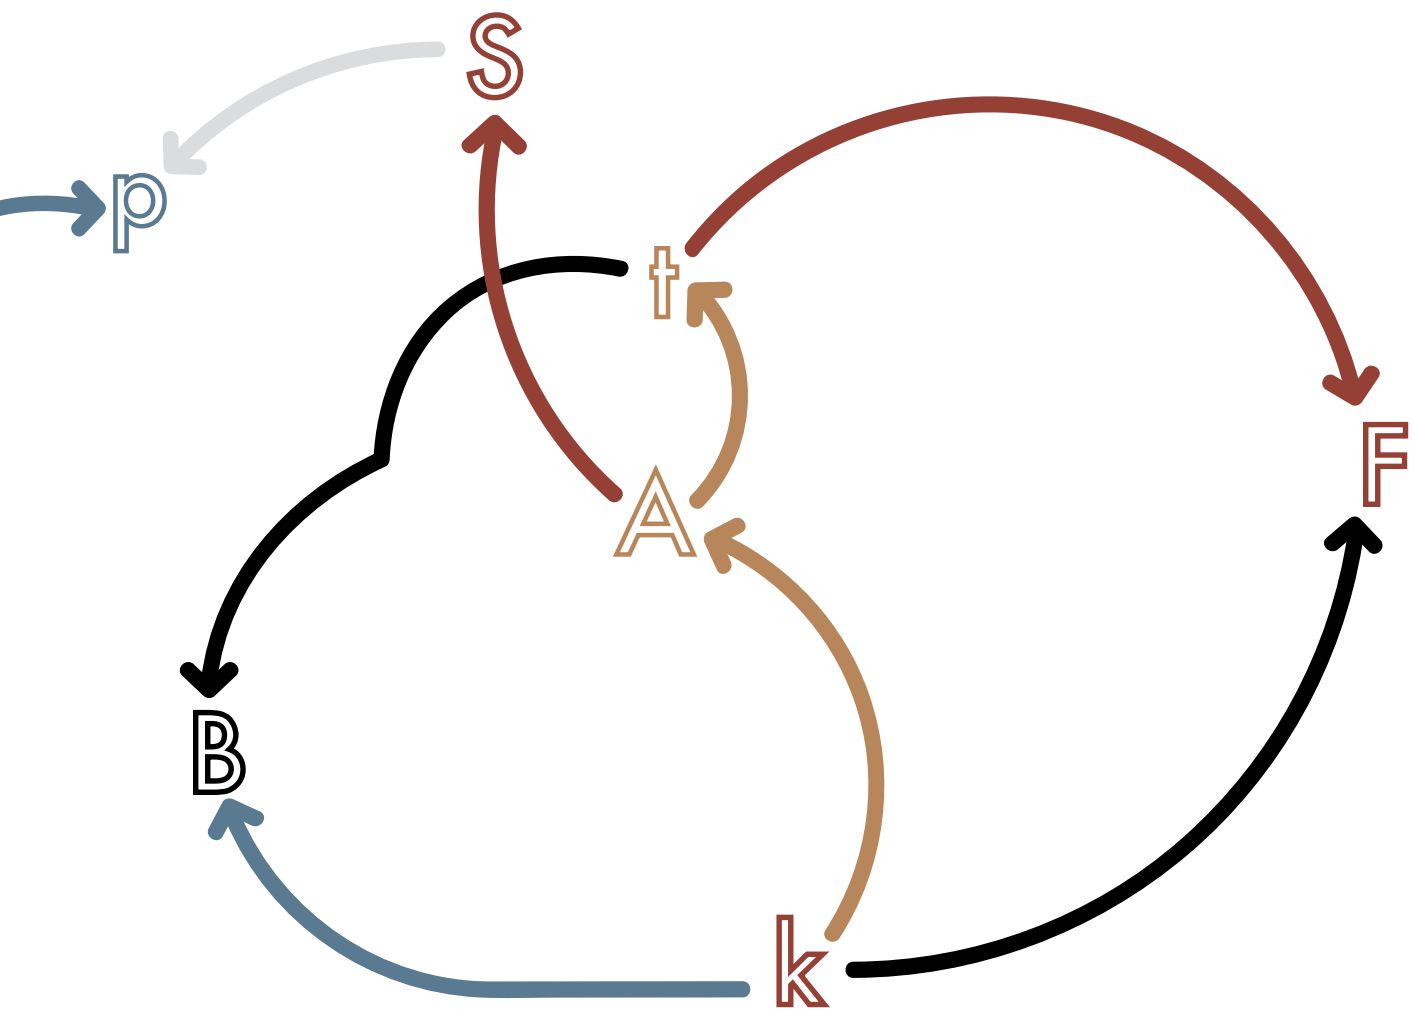

THE CLOUD

WHAT IT IS
HOW IT WORKS
WHY IT IS IMPORTANT

The constant search for solutions that support the reliability of the translated material has led us to adopt a CLOUD-based translation platform with remote management.

We use CLOUD-based translation and terminology management systems to create a collaborative and shared work environment, in which all translated material is made available to the Alpha team and where every stylistic line or translational modification occurs in real time and remains fixed over time. For projects with tight deadlines on which an entire team of translators works, or for long-term projects, we know how to ensure speed, accuracy and consistency of style and terminology.

THE INTERPRETING, EVENTS AND CONFERENCES

HIGH-LEVEL PROFESSIONALS
TECHNOLOGICAL SCALABILITY
GUARANTEED RELIABILITY

The best technologies and the most skilled professionals to build together the credibility of the message and the success of any meeting.

Simultaneous translation is here and now and everything has to be absolutely perfect. The technological solutions we offer are tailored to every need.

We believe that from private negotiation to international conference, the reliability of the technological solutions, the experience of the technicians and the competence of the interpreters can really make the difference.

A stylized illustration of a woman's head in profile, facing right. She has black hair, a grey face, and red lips. A white line extends from her mouth, curving across the page. To the left, a brown and white striped tie is visible against a dark blue background. Below the woman's head is a large red rectangular block.

THE QUALITY

ISO9001
EN15038
PHILOSOPHY

We decided to certify the quality of our processes as a further guarantee for anyone looking for a solid partner to trust in total tranquillity.

We are ISO9001: 2008 certified for the management system and UNI-EN15038: 2006 certified for the quality of the core translation process and all other aspects related to the service, including quality control and traceability. The certification is just one more step in a journey started on our first day of operations, over 10 years ago, in which the goal has always been to continue to outdo ourselves, refining our skills and those of our collaborators.
